

EASYANODE CORROSION MONITORING & PROTECTION SYSTEM

**GAME CHANGING
CORROSION
INDICATOR FOR
MARINE
EQUIPMENT**

SAVES TIME & EFFORT

EasyAnode® will alert you when your anode requires changing without the need to remove it to check if it has depleted.

REMOVES THE GUESSWORK

The EasyAnode® indicator will alert you to corrosion before valuable equipment suffers damage, failure, and downtime.

SIMPLE, EFFECTIVE AND RELIABLE!

- **APPLICATIONS**

EasyAnode® can be installed within the cooling systems of Main Engines, Gearboxes, Generators, Air Conditioning systems, Heat Exchangers, and some Stabilisers. Also, Tanks & Pipework, Sea Chests, etc.

- **ADVANTAGES & BENEFITS**

EasyAnode® has many advantages and benefits over standard traditional anodes which relate to maintenance, early detection of galvanic corrosion, anode breakages, etc.

- **QUALITY & STANDARDS**

EasyAnode® are manufactured from high quality materials, our zincs anodes are Mil-Spec MIL-18001 and the magnesium versions AZ31B. Assembly and Quality Control is monitored by a Lloyds ISO9001:2015 accredited company.

- **WHO IS INSTALLING THEM?**

EasyAnode® has been endorsed by yacht builders, engine, gearbox, generators, stabiliser manufacturers who install them as an added value product that protects the owner's investment.

- **SUCCESS SO FAR?**

To date, more that 350 yachts have adopted EasyAnode® and we have numerous positive testimonials from Engineers on-board who are ultimately, our best reference!
